ENGLAND'S ARMY AND NAVY

Said to be in a Bad Way—Public Frightened at the Condition of Things. LONDON, May 13.—When the usually stolid Englishman gets frightened he goes all to pieces, and his symptoms are ighly entertaining. Just at this mo ment the horrible conviction is rampant in the minds of Britons that the song was wrong after all, and that they are apt to find themselves slaves almost any fine day. The angry muttering about the weakness of the navy and of the country's fighting apparatus generally, has grown into a storm of hysterical in-

has grown into a storm of hysterical indignation.

Instead of singing: "We've got the men, we've got the ships, we've got the money too," this unhappy people are crying out: "We've not got any men or any ships worth mentioning; they won't spend our money to buy 'em, and we could not lick Bulgaria or Switzerland."

The trouble was started by Lord Charles Beresford, who worked his way into a high position in the navy, found that things were in a very rotten condiinto a high position in the navy, found that things were in a very rotten condition, with jobbery, corruption and incompetency plentiful, and said so. Beresford seems a fairly good reproduction of the old, devil-may-care type of British tar, and he is bow-legged. He played unlimited and dangerous pranks as a middy, fought a regular prize fight later on and won it, in a Whitechapel barn on a Sunday morning, and in many other ways has worked into the hearts of his countrymen. While Beresford has been exposing the weakness of the navy, Lord Wolsely has been doing as much for the army, and incidentally explaining how, besides having a weakarmy, England utterly lacked the fortification to keep back the strong armies of other countries.

Hosts of lesser lights have been making speeches and writing articles to add to the panic, and even the old Duke of Cambridge himself, cousin to the Queen and Commander-in-Chief of the army, has proclaimed that things were wrong by begging on every conceivable occasion for money to put them right. The Government is very sensitive to these attacks, which are regularly aggravated by the malicious buzzing of Lord Ranthat things were in a very rotten cond

by the malicious buzzing of Lord Randolph Churchill.

Last night, in the Upper House, Lord Salisbury made an attack upon Lord Wolsely for the latter's indiscreet disclosures, an attack so bitter that it is difficult to see how Wolsely will be able to avoid resigning. This will add fuel to the flame, for Wolsely, having partly through ability, but largely through favoritism, had every opportunity of showing off in critical times, has come to be known as "our only general." Lord Beresford, nothing if not plucky, and who has already resigned because the admiralty would not do as he said, is now challenging them to try him by the admiralty would not do as he said, is now challenging them to try him by court martial and dismiss him in disgrace from the service if they can prove that he has exaggerated and made statements not founded on fact. He is liable to cause a scare and a panic. It is not in the least likely that the admirality will take up the challenge, as Beresford evidently knows what he is talking about. Unfortunately for the country the sole effect of all this scare, so far as one can see, will be to extract a so far as one can see, will be to extract good many millions sterling from the people's pocket, for little attention is paid to the sensible ones who demand pant to the sensible ones who demands that instead of more money being poured into the official rathole, amateur official-ism be pulled up by the roots and good men and a properly organized system substituted.

St. Louis, May 13.—At 11 o'clock yeserday morning the levee situated south of Alexandria, Mo., broke in several places and a vast volume of water began pouring into the town, which was completely inundated. A spasmodic attempt was made to check the irresistible flood, but within a few minutes the laborers quit and accepted the inevitable. Water having reached half of the houses their residents have sought refuge in the upper stories of buildings, where they will be imprisoned until the subsidence of the flood. In the main streets business is entirely suspended. There has been no loss of life nor great damage to property within the town. At this point the Mississippi is fully seven miles wide, and within the range of vision one vast expanse of water greets the eye. The area of farming land in the Missouri bottom that is submerged is estimated at 75,000 acres, and a continuance of the flood will result in an approximate loss to the farming community of that region of at least \$300,000. A depiorable shooting scrape took place at Bellaire about one o'clock yesterday morning at a birthday and beer party on Gravel Hill, at the residence of William Rose. Adam Jenkins in passing James Nicholson stepped on his foot. Nicholson swore at him, and they got up and went out with friends. In a few minutes two pistol shots were heard, and Nicholson was shot twice in the groin. He was picked up and carried into the Rose residence, where he was dying last night. Jenkins lived just in the rear of Rose. He went home and told his wife he had shot a man, and if the officers came, to tell them he was not there. He was watched, though, and presently Capt. William Little, of the police force, asked admission. It being refused, he broke open the door. Jenkins was sitting on the bed with a revolver in his hand. He threatened the officer, but Little was too quick, and shot him in the thigh. He was taken to the lock-up, and is there yet, resting as easy as could be expected. It seems as though Nicholson and Jenkins were good friends, but that Jenkins and the man Rose, at whose house the shooting took place, were at outs, and Jenkins now says if he ever gets a chance he will "do Rose," as he puts it.
